Archive 113Z - Noncompliant Subject Retention

Note:

This whitepaper is partially corrupted and was recovered from an outdated archive set.

Contents:

- Outlines multiple instances of subject retention beyond approved parameters.
- Describes methods used to override release protocols.
- Identifies at least two unregistered subjects retained during the 2018-2019 trial cycle.

Integrity:

Redacted and fragmented sections indicate significant data loss. Some pages may be reconstructed using cross-referenced vault data.
